Profile

Built 10+ projects across web and mobile platforms, focusing on real-world problem solving.

Created Studify - an AI-powered learning platform connecting students with 24/7 tutor support.

My vision is to create tools that truly help people whether it's a student preparing for exams or a business owner trying to grow online.

5+ hackathon attended and Qualified

Professional Experience

Journey of Startup, Co-founder

2024 – present | India

A revolutionary student-focused learning platform, from **zero to 100/100 success score** combining tech, innovation, and educational empowerment. As Founder, I led the full product lifecycle: from ideation, UX/UI design, and app development (Flutter + Firebase + SQLite) to growth strategy and monetization.

HR intern, Intern

2025 – 2025 | remote, India

Assisted in end-to-end hiring, onboarding, and employee engagement processes. Coordinated interviews

Indux5.0 Hackathon final round achiever

Front-end Internship, Intern

11/2024 – 12/2024 | Ankleshwar, India

I was engineering digital experiences that breathe speed, usability, and beauty. I crafted production-ready frontend components with **HTML5, CSS3, JavaScript**, and frameworks like **React.js**, transforming design mockups into lightning-fast, responsive web apps

Algozenith: Student Ambassador

08/2025 – Present | Remote

- Serving as **Campus Lead** for Algozenith, representing the platform at my college.
- Organizing coding workshops, seminars, and contests to promote programming culture.
- Mentoring peers in problem-solving, DSA, and competitive programming.

Smart India hackathon shortlisted team

Education

B.E in Computer Engineering,

2024 – present | Ankleshwar, India

Upl university of sustainable technology

Awarded as **Best Student and Gold medalist**

!2th Science, J.N.V bharuch

India

Completed with distinction from India's premier residential school system, focusing on Physics, Chemistry, Mathematics, and Computer Science.

Skills

Flutter

Proficient in building high-performance, cross-platform Android and iOS apps using Flutter.

C++/Java

Strong foundational understanding of programming logic, data structures, and problem-solving using C, C++, and Java.

REST API Development (Node.js)

Firebase Ecosystem Mastery

Deep hands-on experience with Firebase Auth, Firestore, Realtime Database, FCM, and Cloud Functions. Integrated real-time features, chat, login, and storage with robust backend scalability.

HTML/CSS/JavaScript/frameworks

Proficient in creating responsive, dynamic, and visually appealing web interfaces using modern HTML5, CSS3, and vanilla JS.

SEO & Digital Marketing Basics

Optimizes websites for search rankings and user engagement through metadata, keyword strategies, and lightweight UI.

API Integration / No-Code + Low-Code Power

Languages

English

Gujarati

Hindi

Certificates

Game Logic Architect: Scratch Development Foundations [🔗](#)

Introduction to Basic Game Development using Scratch

App Building with Google Sheets [🔗](#)

AI Visioneer: Computer Vision with Microsoft Azure [🔗](#)

SEO Strategist: Web Visibility Boost with Squarespace [🔗](#)

Interests

Beyond Code: My Interests & Passions — I'm shaping ideas into real world solutions. From experimenting with AI and launching student-first platforms to helping clients grow with beautiful designs, I explore every tool, trend, and tech that pushes the future forward.

Projects

Studify,

Flutter, Firebase, Razorpay, Api integration, Telegram API

2024 – 2025

What Makes It Impressive?

Midnight tutor booking, AI voice tutor, gamified XP system, real-time doubt solving, Ai flash card generator.

krishi Sakhi - farmer friend, *Smart Agriculture through AI, IoT, and Data-Driven Insights*

An intelligent mobile and web platform empowering Kerala's farmers with AI-based crop advisory, pest detection, real-time weather alerts, and Malayalam voice support.

Code Master

Interactive platform with quizzes, coding streaks, badges, and leaderboards

2024 – 2025

Freelance Client Projects (6+ Websites)

2022 – 2024

C++ Brain Snippet App

App focused on logic-based C++ snippets for fast learning, especially useful for DSA prep

AI Brain & Personality Fun Test

Users answer fun questions; AI returns witty personality profiles – viral shareability

AI Startup Idea Generator

User inputs their skills/interests → AI gives 3 startup ideas with plan, tech stack, and monetization strategy.
